SPRING / SUMMER 2024

With each passing season we push ourselves to bring timeless, yet modern, solutions to our consumer's everyday life. This season is about innovation, and particularly innovation in hydration. With revised and bettered features, we are keeping drinks cooler for longer, and bring a more vibrant and diverse assortment than ever before. We continue to design high quality products that become an essential part of workdays and adventures, creating, building, and inventing new products for the gym, hydrating at home, and taking on daily excursions.

OUR HISTORY

In 1913, our founder, William Stanley Jr., invented the all-steel iconic vacuum bottle and formed the Stanley Bottle Company. In the 100+ years since this brilliantly simple solution, his ingenuity has kept our beverages at the desired temperature during outdoor, work, sporting, recreational and other adventures.

OUR IDENTITY

Stanley is defined by Creativity, Building and Invention. Driven by purpose, passion & performance: We are passionate about creating purposeful products that perform. That's how we make a difference. We are proud of our yesterday, focused on tomorrow.

OUR MISSION

At Stanley we believe that through invention and originality we create a more sustainable, less disposable life and world. Our Built For Life™ product promise is the foundation for our approach to sustainability and corporate responsibility.

OUR PROMISE

Since 1913, we've kept our promises. Whether building products to last a lifetime or delivering on innovation of keeping food and drink at the ideal temperature. We've stood behind our word. Backed by our lifetime warranty and our Built For Life™ guarantee, we ensure our products will both endure and sustain in your world – everyday.

SUSTAINABILITY AT STANLEY

Our Built For Life™ product promise is the foundation for our approach to sustainability and corporate responsibility. It is part of our mission to create a more sustainable, less disposable life and world. By the end of 2030, we aim to reduce annual greenhouse gas emissions by 50%.

BUILT FOR LIFE™

Our design principles prioritise functionality and durability. Stanley products are created and manufactured to last a lifetime. And we stand behind that with our Built For Life™ lifetime warranty.

RECYCLED MATERIALS

Stanley prioritise recycled and upcycled materials. We're committed to making at least 50% of our stainless-steel products from recycled materials by 2025.

SUSTAINABLE PACKAGING

We reduce unnecessary packaging and increase sustainable content wherever possible. We have eliminated most conventional plastic packaging. All paper packaging will be certified sustainable or recycled by 2025.

VALUES-LED MANUFACTURING

Stanley seeks suppliers that meet our high standards of environmental responsibility. We work closely with factories to meaningfully reduce energy use in their operations and reward those who show continuous improvement year after year.

RECYCLED STAINLESS STEEL

The material is made from 90% post-consumer scrap steel and is RCS certified. The quality is the same as our proven 18/8 stainless steel. Recycled stainless steel uses fewer natural resources and produces fewer emissions compared to virgin steel. Plus, recycled stainless steel helps keep valuable materials in circulation and out of landfills.

WHAT WE HAVE ACHIEVED IN 2022

SUSTAINABILITY

In 2022, 74% of our footprint was generated by raw materials. Using recycled stainless steel is the most impactful way to reduce this.

23% of Stanley's stainless steel units produced were made of this recycled stainless steel – putting us more than halfway to our goal of 50% of units by 2025.

Stanley procured more than 4 million kilograms of certified, recycled stainless steel in 2022 alone.

ETHICAL SOURCING

100% of Stanley suppliers achieved the highest possible score on their social compliance audits (the equivalent of an 'A' grade), which are aligned to global labor standards.

SOCIAL IMPACT

Stanley donates more than 1% of prior year's net income before taxes in cash donations to non-profit organizations around the world each year.

Every year we publish our impact report that shows our progress around corporate responsibility. You can read the full report on www.stanley1913.com/pages/sustainability.

4D THERMOLOGY™

Stanley's 4D Thermology™ technology elevates our legendary double wall vacuum thermal performance to a best in class insulation. Building upon our double wall vacuum insulation, 4D Thermology™ features two additional thermal barriers between the inner and outer bottle walls for 4 layers of insulation. These four layers add protection from convective, conductive, and radiant energy transfer to lock in heat or cold better than any other technology.

DOUBLE WALL VACUUM

Stanley's legendary thermal performance all begins with our double wall vacuum insulation technology. By removing the air between the inner and outer walls of our vacuum insulated products, we greatly reduce the thermal transfer between the outside environment and the contents of the bottle. The insulation effect of double wall vacuum insulation allows beverages to stay hot or cold longer compared to traditional drinkware or food storage containers without this technology.

AEROLIGHT™

Stanley's AeroLight™ technology takes you farther, faster – bringing a whole new meaning to portable thermal insulation. We took Stanley's legendary double wall vacuum insulation and made it up to 33% lighter. Through advanced manufacturing processes, we stretch the material of the inner wall to significantly reduce weight, without compromising hot/cold retention or durability.

CAFÉ

Stanley Café focuses on the passion of craft coffee, tea or maté, regardless of the setting, scene or environment. Ideal for sitting, sipping and contemplating the world—with a hot beverage in hand—our collection delivers your inspiration with your caffeination.

BAR

Beer, wine or spirits, we all appreciate a good drink, especially with good company in uplifting surroundings. Stanley Bar takes that drink outside with dramatic appeal and truthful technology—whether sharing a cold beverage with the neighbour or enjoying a craft cocktail at sunset.

HYDRATION

Stay healthy, stay hydrated—that’s the defining mantra of our thoughtfully considered drinkware. Built with modern energy, awareness and respect for human wellbeing, as well as the environment, this category brings true invention into our natural daily habitats.

ORIGINALS

It’s hard to outshine our original and this foundational collection stays true to our heritage and brand promise to deliver taste and temperature to the world outside. Honouring our legacy and history, it shows its roots in the brilliant thermal technology that’s delivered for over a century.

CAMP

Stanley Camp brings clean, intelligent, innovative and stylish gear to the global campsite. Whether way out in the woods or closer to home, our entire collection brings both ease and expertise to experiencing the wild without sacrificing the comfort or the culinary harvest.

MOBILITY & STORAGE

When transporting good food or drink is the goal, our innovative storage solutions are designed to keep food and beverages appropriately chill for the task at hand. From beach trips or backyard cookouts to camping out, our collection is shaped and streamlined to embrace and enliven the entire world outside.

HYDRATION CONSUMER MODERN ACTIVE

The Modern Active has a holistic approach to health and lifestyle. They aspire to be outdoors whenever possible, working out, riding their bike, or walking to work. Staying hydrated with their bottle of choice symbolises their life choices.

They are social and love to have the latest outdoor tech and innovation, for use in their outside, urban environment. They appreciate functionality and performance but keep up with modern trends and moods.

AEROLIGHT™ TRANSIT MUG

Our Transit Collection with AeroLight™ technology is engineered to be light, packable, and leakproof for the trail or the daily commute. Our commuter-friendly Transit Mugs are 33% lighter than Stanley's standard stainless steel metal drinkware. The collection is built with Stanley's AeroLight™ technology, which consists of spun-steel, doublewall vacuum insulation to reduce weight—without compromising hot/cold retention or durability. These fully leakproof mugs offer a streamlined design and low-profile lid, compact and easy to carry. They also fit comfortably in car cup holders.

-  AEROLIGHT™ INSULATION
-  DOUBLE-WALL VACUUM INSULATION
-  LEAKPROOF + PACKABLE
-  18/8 FOOD-GRADE STAINLESS STEEL
-  DRINK-THRU LID
-  LIGHT + TOUGH
-  DISHWASHER SAFE

Engineered with the quick mover and the commuter in mind. Don't think about it; just clip it closed and pop it in your bag; it will be ready when you are the same way you left it - a hot cup of coffee or ice-cold water.

INTRODUCING ROSE QUARTZ COLOUR

ROSE QUARTZ is Stanley's newest addition to the Classic line. Refined and sophisticated, Rose Quartz is more of an elevated neutral than a traditional pink, giving it a grounding and balancing appeal. Rose quartz fosters a sense of wellbeing and vitality, fresh and uplifting, yet nurturing and calming. It is also a colour that can span across demographics and seasons, making it a commercially dependable addition to our Stanley Classics.

CUSTOM PRINT

Stanley's Custom Print Program weaves your unique brand signature into our century-old tradition of quality and durability. In an era where customised gifts are on trend, our iconic, award-winning merchandise becomes a vehicle to engage clients and employees, fostering lasting memories. Imprint your logo, and these Stanley essentials transform into bespoke promotional products, carrying your brand's impression as enduringly as Stanley's own legacy.
